

**METABOXES**

- Extremely robust, unbreakable boxes with a wide carrying handle
- Carefully thought-out organisation system within the box...
  - ensures that the correct accessory is always with the right tool
  - special inserts for storing accessories and small parts... and transferring them from box to box - boxes can be stacked and connected - well-structured, clearly arranged storage system, for the workshop, the car, anywhere
- Numerous possible uses, with individually configurable foam inserts (accessories)
- The Metabox stays in shape – even at extreme temperatures (-40° to +90°C)
- No protruding parts, and thus no danger of getting caught up, e.g. on building sites
- With clever accessories for mobile use, e.g. a carrying belt for carrying several connected Metaboxes, providing greater safety, for example, when climbing scaffolding, because both hands are free

Metaboxes for machines		Order no.
